

Department of Mechanical Engineering, Punjabi University Patiala

MST-I (October 2021)

Subject: Manufacturing Processes

Time-One Hour

B.Tech.1st Semester A1 to A12 Groups

Subject code: MCE-102

Maximum Marks:15

Note: Section A is compulsory. Attempt any two questions from Section B.

Section A(Compulsory & 5 marks)

Q1.

- a) What kind of chills are used in casting & why? (1)
- b) Write the significance of rake angles of single point cutting tool. (1)
- c) How the strength of molding sand varies with the moisture content? (1)
- d) Enlist different types of cast iron. (1)
- e) What is the difference between strength and hardness? (1)

Section B (Attempt any two questions & 5 marks each)

- Q.2. Explain the casting defects with suitable diagrams. (5)
- Q.3. Explain the Lathe machine operations with neat diagram. (5)
- Q.4. Explain different types of patterns allowances with suitable diagram. (5)

PUNJABI UNIVERSITY, PATIALA
MANUFACTURING PROCESSES (MCEB 1124 T)
B.Tech. CSE, Semester-1

MST-1

M.M. = 15

Time =60 minutes

Note: Draw neat and clean diagram (with pencil only) to explain the answers.

SECTION-A

Question no. 1 to 5 carries one mark each. All questions (1 to 5) in section A are compulsory.

- Ques.1** What do mean by mechanical properties of engineering materials.
- Ques.2** Explain in brief the importance of manufacturing processes.
- Ques.3** Explain the angle plate and face plate used during lathe machine operations.
- Ques.4** What is the criteria for the selection of different Manufacturing Processes.
- Ques.5** Differentiate between plasticity and ductility of an engineering material.

SECTION-B

Question no. 6 to 8 carries FIVE marks each. Do any TWO questions.

- Ques.6** Explain different types of patterns allowances with suitable diagrams.
- Ques.7** Write in detail different cutting fluids and their functions used during machining processes.
- Ques.8** Write in detail the basic operations of lathe machine.

Good Luck
